

How to Launch the Clean Air Desktop Widget Automatically in Windows XP

Having programs automatically open when you start Windows is handy. If you want the Clean Air Make More Desktop Widget to launch itself every time you turn on your PC, follow these steps.

1.) Right-click the "Start" button in the bottom-left corner of your screen and click the "Explore" option in the menu that is displayed.

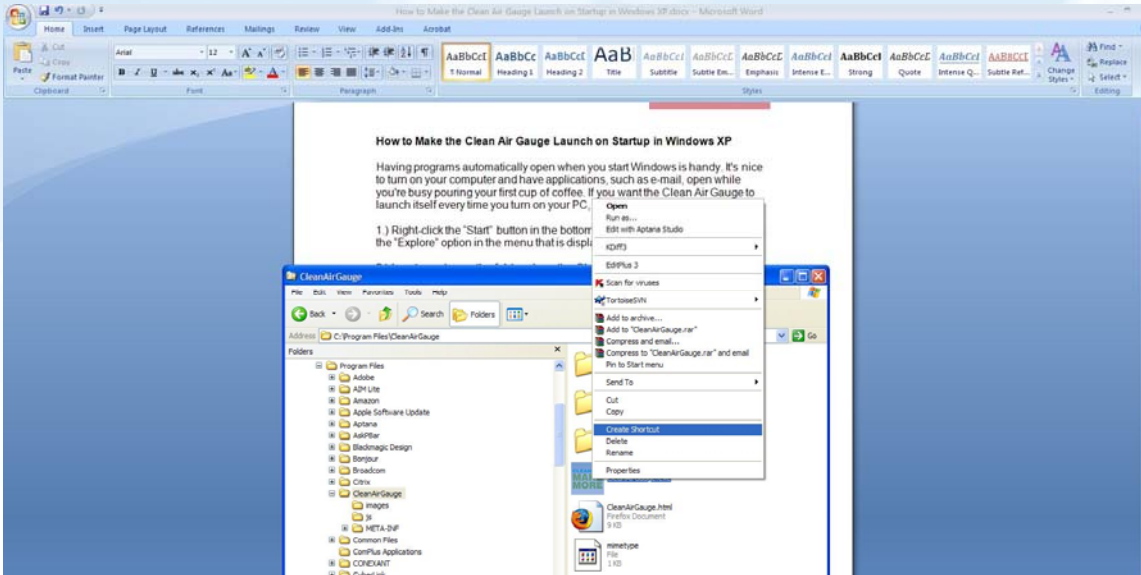

2.) Locate and open the folder where the Clean Air Make More Desktop Widget was first installed. By default this is "C:\Program Files\CleanAirGauge".

3.) Right-click on the “CleanAirGauge.exe” file and click “Create Shortcut”.

If you are prompted saying that “the shortcut cannot be created in this folder, would you rather create it on the desktop” click “Yes”.

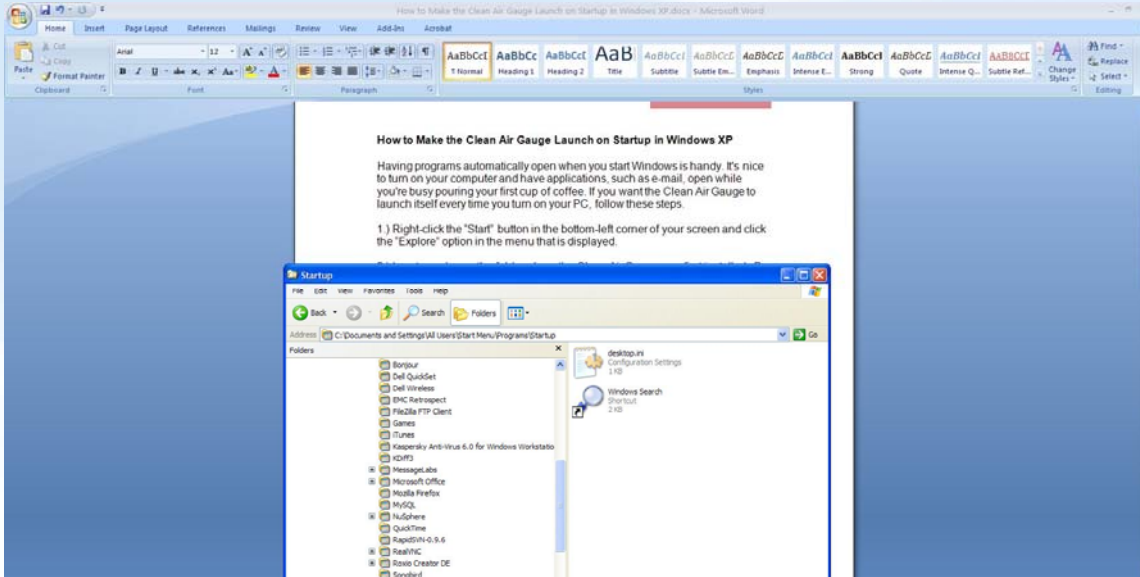

4.) Right-click on the “CleanAirGauge.exe Shortcut” file that you just created and click on the “Cut” menu option.

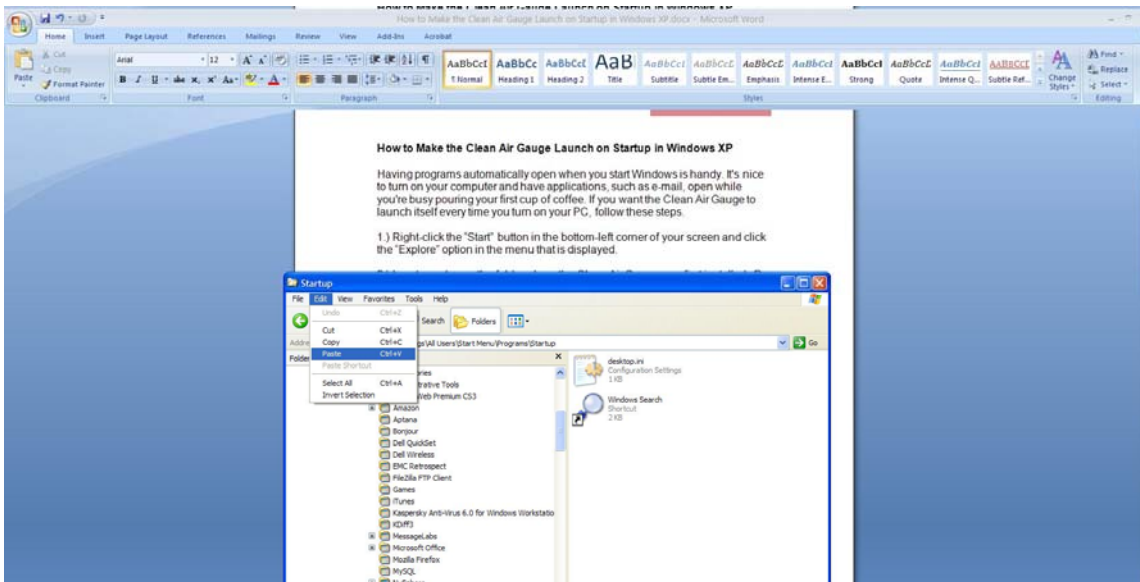

5.) Open the Startup folder for all users on your system. Typically this is located in “C:\Documents and Settings\All Users\Start Menu\Programs\Startup”.

5.) Open the Startup folder for all users on your system. Typically this is located in “C:\Documents and Settings\All Users\Start Menu\Programs\Startup”.

6.) Once you are inside of the “Startup” folder click on the “Edit” menu at the top of the window and select the “Paste” option.

That's it! You can close the explorer window you were using and the next time you restart your computer you'll see the Clean Air Make More Desktop Widget start up automatically.
